

## Community Grant Outcome Report

**Name:** Wisconsin's Adolescent Sexually Transmitted Infection – Protection through Education Project (WASTI-PEP)

**Grantee:** Family Planning Health Services, Inc.

**Academic Partner:** n/a

**Program:** Development

**Grant Duration:** 01/01/2005 to 12/31/2005 (12 months)

**Expenditures:** \$8,986 of \$25,000 (36% expended)

**Use of Funds:** Build capacity

► **Description:** Foster development of a plan to reduce sexually transmitted infections in Wisconsin's high-risk adolescent population; identify interventions that provide adolescents knowledge to help them lessen their risk of infection and re-infection by decreasing risky behaviors and increasing behaviors associated with reduced risk.

► **Results:** The overall goal of this project was to improve sexually transmitted infection (STI) risk assessment for high-risk adolescents in Wisconsin. The community partners identified 10-24 year-olds as the target population for a statewide prevention intervention to begin in 2006, and developed an assessment tool for providers to use to identify adolescents at risk for STIs. Other STI tools, including Wisconsin's State Lab of Hygiene selective screening criteria for family planning clinics, were evaluated to serve as a model for WASTI-PEP's assessment tool. The project engaged two Rock County clinics and the two county health departments to discuss the WASTI-PEP initiatives and gather information.

► **Met Objectives:** Partially met

► **Baseline Progress on SHP Objectives:** Not measured

► **Academic Partner Role:** No academic partner

► **Matched Dollars (cash or in-kind):** \$985

► **Dissemination:** None

► **Sustained:** No
